### *ANATEL's Intention to Grant Licenses for Operation of a Brazilian Satellite Network*

On November 28, 2005, ANATEL issued Act No. 54.323, expressing its intention to grant licenses for the operation of a new Brazilian Satellite Network.

ANATEL informs that the following orbital positions and the related uplink and downlink frequencies are available: 94°W, 92°W, 87°W, 84°W, 80°W, 75°W, 68°W, 51,5°W, 26°W, 16,5°W e 10°W. Except for the orbital position 80°W all others are being coordinated with ITU.

All companies interested in such process shall provide ANATEL, with information of the satellite network that it intends to operate in Brazil, such as slot, frequency bands, coverage area and main use of the satellite for transporting telecommunications signals. The deadline is December 29, 2005.

By means of the Act, ANATEL wishes to identify the number of companies currently interested in operating a Brazilian satellite network so as to determine whether a bid procedure is necessary for granting such right.
